

EPICON 6

Reference Loudspeaker World Launch Tour

Tokyo - Guangzhou - Las Vegas - Amsterdam - Bristol - Munich

The CES (Consumer Electronics Show) in Las Vegas from the 10th - 13th of January served as the the third venue for the presentation of the new DALI reference speaker: The EPICON 6.

Featuring highly refined (patent pending) driver technology, developed and manufactured with passion and skills in Nørager, Denmark, the EPICON 6 loudspeaker sets new standards for music reproduction quality.

First reactions from press and critical listeners confirm our own assessment: The EPICON 6 is not only looking great and built to highest quality standards, it will also be addictive to concerned music lovers.

Follow the news on www.dali-speakers.com and show up on one of the following shows if you have the chance:

ISE / Amsterdam, January 31st to February 2nd
Sound and Vision / Bristol, February 24th to 26th
High-End 2012 / Munich, May 3rd to 6th

The new EPICON 6 will be available for sale from May 2012.

Follow us also on Facebook, where more pictures will be leaked from now and during the coming month until the grande finale in Munich.
